State Assessments 101

The Every Student Succeeds Act or ESSA, requires students to take state tests in reading and math every year in third through eighth grade and once in high school. In Ohio, students in third through eighth grade take the Ohio State Test (OST) in English language arts and math. Students in fifth and eighth grade also take a test in science. High school students take end-of-course tests in English 1 and 2 (classes of 2021 and 2022 only), Algebra 1, Geometry, Biology, American History and American Government.

Studies show that third grade is a critical year for students to learn fundamental reading skills that will help them understand and think critically. As a result, Ohio requires all third grade students to earn a score of at least 683 (in the basic range) in reading on the OST to move onto fourth grade. If a student does not meet that score, the school will create a plan to help the student improve.
To earn a diploma, high school students must earn at least 18 points on a combination of end-of-course tests. On each end-of-course test, a student can earn one to five points for a total of 35 points across all seven tests. Students can retake a test if they need to get additional points. There are also other ways for students to meet the requirement if they have difficulty reaching 18 points.

**A Focus on Grade Level Skills**

Unlike other tests, the OST is focused on grade level material and is aligned to the state standards. The test questions match what students do and learn in the classroom every day throughout the year, which are the grade level skills that are most important for students to learn in order to move on to more challenging content.

The OST is taken online. It includes a variety of different types of questions, including traditional multiple choice, open-ended questions and interactive questions that ask students to plot points or complete tables. Grade level teachers from districts across the state of Ohio are involved in every step of developing and finalizing test questions.

**Grade 6: Math**

Paul could play 16 songs on his guitar. He learns some new songs. Now he can play 23 songs.

In the first box enter an equation to represent the number of new songs, \( s \), that Paul learns.

In the second box, enter the number of new songs represented by \( s \) in this situation.

**Grade 3: ELA**

Which sentence from the passage supports the idea that the Coleman brothers have experience with making maple syrup?

A “The Coleman brothers—Nelson Ralph, and Harold—step out their front door in Vermont.”

B “As they pass the 75-year-old sugar-maple trees, sap drips from holes in the trees into metal buckets.”

C “Every spring, the Coleman brothers tap holes into sugar-maple trees, then hang a bucket under each hole to catch the sap.”

D “They don’t worry too much about why the sap is running in their trees this morning.”
**Useful Information for All**

**FAMILIES: Understanding Grade Level Performance**

The OST family report gives families information on how well their child performed on different sets of skills in each subject. Families can use this information to identify where their child is doing well and where they may need support or practice. This helps families better support learning at home. It can also help them start meaningful conversations with teachers, set goals for each student’s areas of improvement and to identify resources and strategies that can be used at home and in school to help students make progress.

**Questions to Ask the Teacher about Your Child’s OST Family Report:**

- What does this mean about my child’s learning?
- Is my child on grade level?
- Where does my child need more support or improvement?
- What short-term learning goals should my child meet to show progress?
- How can I support learning at home?

**TEACHERS: Informing Instruction**

Students take different types of tests throughout the school year. Some students take benchmark or diagnostic tests, such as MAP Growth, i-Ready or STAR. These are taken several times a year and measure mastery of important concepts and skills in reading and math. Students take a test at the beginning of the year to identify their “starting point” and again throughout the year to measure their progress. Benchmark tests help teachers identify and address learning gaps early on so students can stay on track to meet grade level expectations. While the OST is only given at the end of the school year, it is one way of showing how much progress students made from the beginning of the year and how well they met grade level expectations.

Teachers also use OST results reports to determine the skills a student needs more support with and to tailor instruction to meet student needs. Teachers can use the results to look for trends in their students’ learning to see what skills or concepts students learned and what content they struggled with. This helps teachers identify what they taught effectively and where they need to improve or change their instructional strategies.
SCHOOL & DISTRICT LEADERS: Informing Decisions

OST results are critical for school and district leaders to make informed decisions about schools and students. School and district level test scores show leaders how students across a school or district are performing and indicate if a certain group of students or schools need more support. This allows them to target additional support or resources to help those schools improve. District leaders can also use OST scores to understand what strategies and/or changes are working.

STATE LEADERS: Helping Schools Improve

State leaders use OST results to identify schools and districts that need more support and resources. They identify the schools with the lowest performance in the state, as well as schools with certain groups of students that performed much lower on the test than the rest of the students in that school. These schools receive additional funding and resources from the state to support students and teachers. For example, schools may hire more teachers or tutors or they may purchase additional instructional materials and programs, depending on the needs of their students.

Where Can I Go for More Information?

- For more information, visit Education.Ohio.gov/Topics/Testing
